We welcome every one of you to take a few moments out of your day to have a look at our site which we have tried to make more informative and reader friendly. We hope you enjoy it!

Tip of the Day..... How to clean your computer screen!

Keeping your computer screen clean isn't as easy as you think. Here are a few hints on how to keep your computer screen looking clean whether at work or at home.

- ✓ Firstly, power down your monitor before you begin.
- ✓ Do not use any all-purpose household cleaners or anything containing ammonia or alcohol.
- ✓ Using a soft cloth, dust off your monitor and gently wipe down your screen.
- ✓ If your screen is still not clean, use a lightly moistened cloth to clean your monitor. Use distilled water, or a 50/50 mixture of white vinegar and distilled water.
- ✓ Use light, rapid circular movements so as to eliminate any streaking.
